

Direkt In - a refusesack carrier from Jonsac!

Fast, good service and quality in the right time are watchwords that Jonsac AB lives up to since 50 years back. We are a company in Otterbäcken, on the East side of the lake Vänern. We produce papersacks and paperbags. We also extrude polyethelen packaging products to be used for wrapping and covering our customers' products. Our production is environmentally conformed and able to print 1-4 colour printings. We are ISO9001 certified.

Direkt In is a refusesack carrier with many functions. It can also be used as a convenient goods carrier or a dustspan. Direkt In is made of steel pipe and sheet metal. Wheels are 200 mm in diameter and are placed wide enough to allow a smooth transport on most surfaces.

Direkt In can be used within

- Disaster areas
- Hospitals
